

Dr. John D. Russell

Technical Director, Manufacturing
and Industrial Technologies Division
Air Force Research Laboratory

Dr. John D. Russell is the Technical
Director of the Air Force Research
Laboratory's Manufacturing and
Industrial Technologies Division.

In this role, he is the Chief
Technology Officer of the Air
Force's Manufacturing Technology
(ManTech) program and is the
principal advisor to the
Manufacturing and Industrial
Technologies Division Chief on all
matters related to the technical
strategy for the Air Force's \$265M
per year program as well as the
personnel and infrastructure required
to execute that strategy.

He has a Doctor of Science degree in chemical engineering from Washington
University in St Louis.

In 2011, Dr. Russell was inducted as a Fellow of the Society for the Advancement
for Materials and Process Engineering (SAMPE).
